Mr. Colin Gomes
DNREC
Asbestos Management & Control Program
715 Grantham Lane
New Castle, Delaware 19720

SUBJECT:

2014 ANNUAL NOTIFICATION

ASBESTOS-CONTAINING MATERIALS

Dear Mr. Gomes:

This letter is to advise you that the Delaware City Refinery expects to undertake a number of routine individual projects during the calendar year 2014 that could involve the removal of asbestos containing material. For the most part, such removal will be in support of scheduled and unscheduled maintenance activities such as routine inspections, repairs, and replacement of process lines, valves, etc. Please refer to the enclosed asbestos containing material notification form for specific information.

ECEIV

and Enforcement Branch

In addition, periodically there will be non-routine individual projects involving the removal of asbestos-containing material in amounts greater than 260 linear feet and/or 160 square feet. For these projects we will be submitting **TEN-DAY NOTICE FORMS** under separate cover.

For all small projects, less than the above referenced amount, all friable asbestos containing material removal will be conducted with all necessary precautions to prevent asbestos from becoming airborne, as delineated in Section 10 of Regulation 1121. Disposal of the bagged asbestos-containing material will be off-site to an approved facility.

The procedures used in asbestos-containing material removal at the Delaware City Refinery are set forth in Standing Instruction 2.6.1. These Instructions are intended to cover the applicable requirements of both Federal NESHAPS and OSHA regulations. Our current Standing Instruction is available for your review.

Please contact me at (302) 834-6212 or $\underline{\text{Michael.Hayes@PBFenergy.com}}$ if you have any questions.

Sincerely,

Michael L. Hayes

Environmental Engineer

Enclosure
